SAFETY

Confined Space Entry "CSE"

By National Utility Contractors Association

Millions of employees who enter into confined spaces each year face a significant risk of injury or death. Many of these same employees do not recognize that they may be facing serious unforeseen hazards by working in a confined space.

NUCA's Confined Space Entry course is intended to provide construction managers, competent persons, and workers with basic information regarding entry into confined spaces. Its purpose is to create an awareness of the hazards associated with confined spaces and to provide managers with basic information necessary to establish a confined space entry program. Every confined space is unique. Therefore, each confined space must be carefully evaluated, and hazards must be eliminated or controlled before a confined space entry supervisor issues an entry permit.

- **Course Time 5hrs**
- **Training Class Minimum 10**
- **Training Class Maximum 20**
- **Minimum Knowledge Test**
- **Wallet Cards and Stickers**
